

Petition in Support of The Prostate Cancer Awareness Act of 2003

Because

- Prostate Cancer is the number 1 diagnosed (non-skin) cancer in the State of Florida, and
- the 5-year survivor rate is 95% when detected early,

The Florida Prostate Cancer Act 2003 has been submitted to the Florida Legislature to promote early detection and public education about prostate cancer.

We the undersigned respectfully request our legislators to co-sponsor, support and enact into law The Florida Prostate Cancer Act of 2003.
